

## **<!--!    Formatting Tags   -->**

- **Formatting Tags** are used in HTML to change the appearance of text or content, applying different styles such as bold, italic, underline, and more.

### **2. List of Formatting Tags**

#### **1. <b> Tag**

- **used for:** Displays the content in bold format.

- **Example:**        **<b>**This text is bold.**</b>**

#### **2. <strong> Tag**

- **used for:** Displays the content in bold format, and conveys that the information is important.

- **Example:**        **<strong>**Important text in bold.**</strong>**

#### **3. <i> Tag**

- **used for:** Displays the content in italic format.

- **Example:**        **<i>**This text is italic.**</i>**

#### **4. <em> Tag**

- **used for:** Displays the content in italic format and adds emphasis, an alternative to the **<i>** tag.

- **Example:**        **<em>**Emphasized italic text.**</em>**

#### **5. <u> Tag**

- **used for:** Underlines the content.

- **Example:**        **<u>**This text is underlined.**</u>**

#### **6. <ins> Tag**

- **used for:** Underlines the content, an alternative to the **<u>** tag, often used to indicate inserted text.

- **Example:**        **<ins>**Inserted and underlined text.**</ins>**

## 7. **<strike>** Tag

- **used for:** Strikes off (crosses out) the content.
- **Example:** `<strike>This text is struck off.</strike>`

## 8. **<q>** Tag

- **used for:** Provides quotations around the content.
- **Example:** `<q>This is a quoted text.</q>`

## 9. **<mark>** Tag

- **used for:** Highlights the content with a yellow background color.
- **Example:** `<mark>This text is highlighted.</mark>`

## 10. **<sup>** Tag

- **used for:** Displays the content as superscript, raising it above the baseline.
- **Example:** `H<sup>2</sup>O`

## 11. **<sub>** Tag

- **used for:** Displays the content as subscript, lowering it below the baseline.
- **Example:** `CO<sub>2</sub>`

## 12. **<pre>** Tag

- **used for:** Preserves both spaces and line breaks, displaying content exactly as written, often used for preformatted text.
- **Example:**

```
<pre>
Line 1
Line 2
Line 3
</pre>
```
